### Torsion Fields & Metaphysics/Parapsychology

by **Jonna**

I was doing some physics reading and stumbled across something that would be of interest to this forum: a scientific explanation for metaphysics/parapsychology. I found it in relation to non-locality of the space time continuum. Hope you enjoy!

What is a Torsion Field? According to A. Akimov, these fields come in at least three types: E-fields, S-fields, and G-fields. The E, S, and G stand for Electric, Spin, and Gravity fields. The torsion field and its emanations are subtle energy fields. They are separate and distinct from classical Electric, Magnetic, and Gravity fields. Generators for these fields can be shielded against electro-magnetic fields and the **torsion** field still manifest itself through such shielding. **Torsion** fields can be generated, detected, switched on and off (such as for communication purposes), and are a distinct type of energy field heretofore not included in today's classical physics. **Torsion** field emanations can travel at velocities at least as high as 109 times the speed of light. **Torsion** fields can interact with laser beams (change frequency); affect biological processes; are generated by melting or solidifying some materials; affect quartz crystals; affect some electronic components; can favorably change some beverages; and have been noted to affect gravity.

According to Akimov, **torsion** fields coupled with the standard electric, magnetic, and gravity fields should provide means for a unified field theory that will extend the realm of science to include the effects of consciousness. The concept of dowsing, for example, can now have a scientific basis for explanation of the phenomenon. If this suggestion by Akimov proves viable, then science has an opportunity to extend its borders more rapidly into the so-called psychic realms. That could be a multi-decade venture of considerable importance to the expansion of scientific knowledge.

A couple of issues ago, NEN began advertising "gravity-wave tapes" and a multi-channel "gravity-wave detector". You may question our motive. After reading some of the Russian literature about **torsion** fields, your editor became almost convinced that there was a similarity between the so-called gravity waves of Ramsay and Hodowanec and the **torsion** fields. If correct, then the Ramsay gravity-wave detector will be an excellent **torsion**-field measuring instrument. Therefore, we have obtained copies of professional papers from three groups of scientists working on **torsion** fields in Russia. All three of these **torsion**-field articles are published in volume2, no. 3-4 of the Journal of New Energy.

In Russia, several types of **torsion**-field generators have been patented and some are available to purchase.

<http://www.twm.co.nz>

As a result Akimov et al. view the vacuum as a physical medium that can assume various polarization states. Given charge polarization, the vacuum is manifested as the electromagnetic field. Given matter- polarization, it is manifested as the gravitational field. And given spin-polarization, the vacuum manifests as a spin- field. All fundamental fields known to physics correspond to specific vacuum polarization- states.

Thus the above "**torsion**- field theory of the physical vacuum" can claim that all objects, from quanta to galaxies, create vortices in the vacuum. The vortices created by particles and other material objects are information carriers, linking physical events quasi- instantaneously. The group-speed of these "**torsion**- waves" is of the order of  $10^9$  C — one billion times the speed of light. Since not just physical objects, also the neurons in our brain create and receive **torsion**- waves, not only particles are "informed" of each other's presence (as in the famous EPR experiments), also humans can be so informed: our brain, too, is a vacuum- based "**torsion**- field transceiver." This suggests a physical explanation not only of quantum non- locality, but also of telepathy, remote viewing, and the other telesomatic effects discussed above.

<http://www.goertzel.org>

Spin waves in condensed matter are a current and well-studied topic in modern physics. However, there is a less-known backwater in this field: **Torsion** Fields, the quantum spin of empty space; the large-scale coherent effects of the spin of the particles in the virtual sea.

Initial work in this field was performed by Einstein and Cartan in the 1920's, now known as ECT (Einstein-Cartan-theory.) Currently there are rumors that spin waves have real physical consequences, and that useful technology can be based on such things. If "**torsion** fields" can be used for communication, they could explain such things as telepathy and PK. Most of the recent work has been done in Russia, but now and then interesting things appear in the US as well.

### **Torsion fields and bioenergy healers**

Russian research posits an approach for describing many, if not all, the biopositive and parapsychological phenomena related to bioenergy healing and conscious intention. This research has postulated and tested the existence of "**torsion** fields." Russian scientist Akimov and his team consider the quantum vacuum as a universal **torsion** wave carrying medium. The **torsion** field is said to fill all of space isotropically, including its matter component. It has a quantal structure that is unobservable in non-disturbed states. However, violations of vacuum symmetry and invariance create different, and in principle observable, states. These theorized "violations" and "invariances" may be what the energy practitioners are creating, which induces changes in the gamma radiation previously described.

The theory linking biopositive physiological effects of bioenergy therapies with radiation hormesis has been well described.<sup>4,5</sup> Radiation hormesis is the concept of using small doses of ionizing radiation in a manner which has a beneficial affect on the body. In summary, whole body exposures of mammals to low-dose irradiation (doses  $<10$  cGy/y;  $<10$  rad/y) has been found to stimulate major physiologic parameters including reproduction, growth, muscular development, mental acuity, cell repair systems (DNA, RNA, membranes and shock proteins), and immune competence.<sup>12,13,14</sup>

Similar biopositive effects have been noted following bioenergy healing therapies including reduced anxiety in hospitalized cardiovascular patients,<sup>15</sup> chemotherapy oncology patients,<sup>16</sup> and premature neonates.<sup>17</sup> Other research has shown bioenergy therapies reduce tension headache pain<sup>17</sup> and dramatically increase the rate of healing of dermal punch wounds.<sup>18</sup> One pilot study demonstrated a

decrease in the concentration of suppressor T-cells implying an increased immune response.<sup>19</sup> A separate study showed significant changes in hemoglobin and hematocrit values after treatment.<sup>20</sup>

Work by renowned Chinese scientist Dr. Shu-Zheng Liu of the MH Radiobiology Research Unit of Norman Bethune University demonstrates that in both human populations and animal studies low-dose radiation (LDR) stimulates the immunological responses.<sup>21</sup> The up-regulation of immunity following LDR involves a series of cellular and molecular reactions as well as their systemic regulation. The results obtained by Lui and many others have compelled researchers to conclude that whole-body irradiation (WBI) with X- and gamma-rays in the dose range within 0.2 Gy has definite positive effect on the immune system which can be considered as beneficial to the organism.<sup>22</sup>

Similar types of improved immune responses have been reported by the Russian scientists with the use of generated **torsion** fields. "In a laboratory of radiobiology of Perm University we have investigated the effect of static **torsion** field on mice. . . The experiments have shown that **torsion** field has immune-stimulating effect showing itself in the activation of both cellular and humoral parts of the immune system. Being 53.3% for the control mice, the content of rosette forming cells was as high as 71.0% ( $p < .001$ ) for the mice subjected to the action of **torsion** radiation. Appreciable differences in the response of the humoral part of the immune system for the unexposed and exposed mice were also detected: the titer of antibodies being 8.33 for the former and 11.70 for the latter."<sup>11</sup>

conscious intention (causing heightened electromagnetic fields in the surrounding the hands) -> alteration of the **torsion** field -> distortion of Vacuum/ZPF (radiation hormesis) -> restoration of substance equilibrium

### **Remote Viewing, Predictions & Military Applications**

"Theoretical works appeared, confirming the reality of PSI-phenomena, the existence of so called **torsion** component in the right part of the gravitational equation by A. Einstein (19), and the construction of technical models of the **torsion** fields radiation generators is reported in some works (20, 2). All such publications and communications talk about the possibility to use the presented PSI-phenomena with the intent to attack as well as with the intent of the perfection of the defense of the government and its means of armament. . The following PSI phenomena of human being and animals are the object of the study: prediction of future, secret reading of the present and past time, hypnotical effects and zombieng, search and finding of indicated lost objects

The basic problems of the construction and areas of the use of psychotronic weapon result from those: construction and use of military PSI generators, collecting of intelligence (PSI-detectors), construction and use of battlefield PSI generators, construction and use of TSULIPs - centers for control of people and apparatus - basic system of communication: networks of telephone, radio and television broadcasting; system of **torsion** communication and radiation, i.e. networks of PSI effects, construction of bioautomats-robots

Building of models and analogs of PSI-abilities and phenomena - the task which is nowadays in the order of the day.

PSI weapon this is the "ray weapon" (powerfull generators, radiating pencils of rays, serving as a striking factor) and ENERGO-INFORMATIONAL CURRENTS OF RADIATION ORGANIZED IN A SPECIAL WAY (coherently), of known as well as unknown physical nature.

To make the reader understand everything what will follow we will give some definitions and a short survey of the PSW problem.

The first level - this is the psychological problem. I would call it a MACRO-problem. This is the problem of the control of the state of the consciousness of human being and society and, consequently, depending from the consciousness - of the psychology of the behavior of human being as a person, group, socium. This is the problem of the use of internal biological mechanisms and laws controlling such or other psychological condition or behavior.

With respect to numerous manifestations of anomalous, unusual (for the classical psychology) or parapsychological phenomena as is the case of clairvoyance, extrasensory perception, telekinesis, phenomenal memory and out of the ordinary calculating abilities (the experiments by Messing, Kuna, Gorin) and other mysterious qualities of the psyche, the new direction of scientific research and technical design (construction of technical means of registration, measurement and influencing of the brain) came into being called PARAPSYCHOLOGY.

The second level - MICRO-problem. The designation of this problem as a PSI problem is derived from the use of mathematical apparatus, methods and means of measurement of the QUANTUM MECHANICS (QM) for the research on AP (anomalous phenomena) of the psyche.

The fundamental wave equation of QM, the equation by Schrodinger, contains the mathematical symbol of the greek letter PSI defining the wave function which describes the undulatory behavior of quantum mechanical object (ensemble). It is believed that the processes and the mechanisms of consciousness (thinking), the processes of subconsciousness (under the threshold processes), i.e. all psychic processes in the brain, are governed by quantum-mechanical laws. Aside from that a much more sophisticated scientific discipline came into being - scientific and technical PSI-quantum mechanical discipline of the research and control of the mechanisms and laws of thinking and psyche at the MICRO-level -the level of elementary particles and physical vacuum (19).

So the two apparently opposed worlds or levels, MACRO world and MICRO world, enter the worlds of thinking, consciousness and psyche.

And a hell of a lot more at:

### **Nazis, Torsion Fields & Remote Viewing**

During the last stages of World War II nazi scientists, directed by the SS, were looking for radical new sciences with which to defeat the allied powers. In the process the Germans first discovered **Torsion** fields, a new branch of field phenomena generated by spinning objects. The SS scientists found that spinning an impellor, which compresses air into an inwardly spiralling vortex, produces lift when spun above 20,000 RPM. In turn this appeared to ionise the air and was self sustaining. They also experimented with **torsion** fields to manipulate space/time.

This new science may have remained unexplored with Germany,s defeat but in 1995 the Tomsk Polytechnic in Siberia began studies in the field of spin **torsion** interaction. It must also be remembered that while the Nazis were conducting scientific research they did so with a thorough understanding of metaphysics.

When you spin an impellor above 20,000 RPM it produces a spinning electro-magnetic field from the ionisation of the air particles by centripetal motion; the Russians have done experiments with electro dynamic generators and the nazis experimented with spinning radioactive metallic fluids. The spinning electromagnetic field is, as it were, a warping of 5 dimensional space; so the **torsion** field itself can be thought of as a warping of 5th dimensional space.

Hal Puthof the NSA scientist who ran the Stanford Research Institute,s Remote Viewing program has been promoting the idea of zero point energy, the energy of the quantum vacuum which, if it can be tapped into, would provide limitless power. John Hutchinson, an eccentric Canadian inventor,

has been using bizarre electronic equipment that has produced levitation, telekinetic force, transmutations of metals and pyrotechnic phenomena.

This author concludes that **torsion** fields disturb the 5th dimensional plenum that provides energy for 4th dimensional manifestation; when rotated above 20,000 RPM this breaks the ground state energy for manifestation and causes:

Changes in the 4th dimensional space time continuum. This in turn can affect gravity, electromagnetism and the strong and weak nuclear force. May produce energy for use in the everyday world. Can affect the manifestation of 4th dimensional space.

In quantum mechanics the observer collapses the quantum wave function simply by observing the event; **torsion** field generators can raise this process from the microscopic to the macroscopic realm. If we think of a human beings physical body as being a 4th dimensional energy system, a trained Remote Viewer has developed a 5th dimensional energy body which, with the right protocols, can then interact with spin **torsion** fields; in effect acting on the 5th dimensional plenum to change 4th dimensional manifestations.

By this method every single semi-conductor in the arsenal of US weapons systems can be rendered completely useless by changing the quantum mechanical parameters of the electronics. This means that a single Russian Remote Influencer could render the entire US war machine to so much expensive scrap metal. US Remote Influencers are now routinely implanted and are thus disturbed or even driven mad in the presence of **torsion** fields; which means that the Russians will have few effective adversaries in this new form of warfare.

<http://www.rialian.com>

Over the course of the 20th century, various investigations in different countries, representing a variety of professional interests, repeatedly reported the discovery of unusual phenomena that could not be explained in the framework of existing theories. Since these authors could not understand the physics of the observed phenomena, they were forced to give their own names to the fields, emanations and energies responsible for the creation of these phenomena.

For instance, N. A. Kozyrev's "Time Emanation", W. Reich's "O-Emanation" or "Orgone", M. R. Blondlot's "N-Emanation", I. M. Shakhparonov's "Mon-Emanation", A. G. Gurvich's "Mitogenetic Emanation", A. L. Chizhevsky's "Z-Emanation", A. I. Veinik's "Chronal field" and "M-field", A. A. Deev's "D-field", Yu. V. Tszyan Kanchzhen's "Biofield", H. Moriyama's "X-agent", V. V. Lensky's "Multipolar Energy", "Radiesthesiatic Emanations", "Shape Power", "Empty Waves", and "pseudomagnetism", H.A.Nieper's "gravity field energy", T.T.Brown's "electrogravitation", "fifth force", "antigravitation", and "free energy". This list can easily be continued...

The spin field can be detected with orgone accumulators. I daresay that the orgone detection instrument which is shown on [www.orgonelab.org](http://www.orgonelab.org)... will be able to act as a spin field detector. This is due to my observations of interactions between the spin field and orgone accumulators. One night, quite by accident, I left an orgone "shooter" exposed to a spin field for some 3 hours. (I was experimenting to see if there was any interaction between the spin field and orgone.) I had noted, before I became distracted, that when the orgone "shooter" was exposed perpendicular to the spin field, that the orgone output, as registered by my perceptions of orgone, had increased manifold. (The orgone "shooter" is a tube through an orgone accumulator which causes the orgone energy collected by the accumulator, to be funneled out of one end of the tube.) When I returned, I turned the spin field generator off. To my surprize, the orgone shooter continued to produce its extraordinarily prodigious output for some 15 hours after the spin field was turned off! After that 15 hours, I observed another extraordinary phenomena: A black funnel appeared in space centered on the opposite end of the tube from which orgone had been prodigiously pouring. This funnel became larger and more dense with time. And a strange sensation arrived with the funnel. The black funnel

persisted for about 15 minutes, then faded rapidly. I got the sense that the energy which had radiated out the one end of the tube, was being "neutralized" by this dark funnel effect. This seems to me to be an effect of the vacuum compensation mechanism.
